Our mission is to grow green and resilient urban places where people and nature can thrive. We were originally set up in 2003 as a heritage and environmental regeneration project and with our partners have turned 42 hectares of derelict land and heritage buildings into a unique, beautiful, and sustainable landscape for people and nature to enjoy. We are now a multiple award winning team and place and have become a beacon for place-based urban resilience with an social, economic and environmental impact on our local community and beyond.
